Great – thanks Ian. John – Frank is going to follow up regarding access to the services.

Hi Cheryl!

I was in the process of responding to your email with the same email that John just sent..

Please use the map services provided below – the ones you identified were rough services that I published internally, to ensure that our data was functioning correctly. I'm updating them, but only occasionally. Definitely unreliable..

Thanks for shifting over to our Region 8 host for the Gold King Response!

This is where the Region 8 operations map services will be stored and maintained throughout the ER. We might add more map services. Most of them are secure so if you need a token let me know.

Subject: Map services for Gold King

John, John and Ian,

We located map services for Gold King Mine that presumably one of you made. I had Frank add them to a web map to show a few ER folks in R9. These map services are very helpful for R9 response so thanks to you or whomever created them. Today we opened our map and the map services had changed. We re-added the new ones to the map without any problem. Just wondering if you'll be maintaining them now in their current form? Our regional administrator is now looking at this map so don't want it to break.

These are the map services we're using:

https://r8.ercloud.org/epar8gis/rest/services/GoldKing/GoldKing_Operations_Photos/MapServer

https://r9.ercloud.org/epar9gis/rest/services/START_ER/GoldKing_Operations/MapServer

I know you're probably very busy with this and other things so we'll keep checking back if anything has changed. Feel free to email me if there's anything you need from me or need to let me know about.

Thanks,

Cheryl
